You will be told you can't do it, but do you want to authenticate When you do, it will ask you to replace.. On the Preferences tab, click the E-mail Options button Mail usually picks up the right settings automatically when you enter the information for your email accounts, but sometimes, these settings need adjusting.. 3, but it is in the same folder, just called 'Message strings': /System/Library/Frameworks/Message.. vi of course works fine, or you could use Pseudo to get super-user privileges for a GUI app.. Cc: cc recipient 1; cc recipient 2; etc Subject: subject I can get as far as the first two lines, (by changing the default to 'n-----Original Message----nFrom: %3$@ nSent: %1$@, at %2$@n') but I can't figure out how to get the 'to', 'cc', and 'subject' fields to work.

That's ugly, and a wast of space :/---:: Jedi Knight :: -- Mac Rules! -- And, BTW, the reply should go AFTER the quoted text.. And there is no way to edit a post Well :(Anyways, what *really* bugs me is that the signature now is place TWO blanck lines bellow the last line.. Open Activity monitor from Utilities or using Launchpad ; Search for anything with Mail, highlight them and click on the 'X' at the top left corner of the screen to force quit the app; Open up a Finder app session; You will need access to your User library; Go to Folder 'Containers com.. e maximum privacy Strangely enough if I go to my Outlook Com account via a web browser then all the auto-complete suggestions there - which match what's on my PC - can be deleted.. I got this here: [code]'REPLY_ATTRIBUTION' = 'On %1$@, at %2$@, %3$@ wrote:nn';[/code] Cheers---:: Jedi Knight :: -- Mac Rules! --Forgot to change the post mode to HMTL, sorry.. Free bible software for mac os x 10 44 11 :((((---:: Jedi Knight :: -- Mac Rules! --It looks like the format up there is a bit off.. Just a quick note for the maybe-bewildered vi-haters: You can't do this in pico Maybe because of the file's encoding, you can't view the text properly.
